Space (Magic Tree House Research Guide)

Synopsis

Track the facts with Jack and Annie! When Jack and Annie got back from their adventure in *Magic Tree House #8: Midnight on the Moon*, they had lots of questions. How did the universe begin? How long does it take to get to the moon? How hot is the sun? What does it feel like to be in space? Find out the answers to these questions and more as Jack and Annie track the facts. Filled with up-to-date information, photos, illustrations, and fun tidbits from Jack and Annie, the *Magic Tree House Fact Trackers* are the perfect way for kids to find out more about the topics they discovered in their favorite *Magic Tree House* adventures. And teachers can use Fact Trackers alongside their *Magic Tree House* fiction companions to meet common core text pairing needs. Have more fun with Jack and Annie on the *Magic Tree House* website at MagicTreeHouse.com!

Age Range: 7 - 10 years

Grade Level: 2 - 5

Customer Reviews

This is a bit out of date. Perhaps children won't mind. Pluto is no longer a planet. Plans for humans to go to Mars have been scrapped. The Very Large Telescope in Chile was completed years ago. Etc. It says there is no proof that UFO's exist when clearly objects that haven't been identified do exist, there's just no proof they are space aliens. But, nevertheless probably a fun book for kids who like science.

The kids realy like the animations and presentations of this book. While it is definately not boring, the planets themselves get only one page each of factual info in super small text. The solar system overview chapter was great for group reading and was primarily what I used from the book, including a photo of a meteorite in comparison to the size of children. Translation: great as a fun addition to learning but not to replace hard fact texts and in-depth lesson plans.---You don't need to read the accompanying Magic Tree House fiction book in order to use this research guide.

We love all the research guides for MTH. They are written at a higher Lexile level than the stories but it makes them fun to read together. My 6 year old doesn't have the patience to read through a research guide the entire way through on her own but together it makes for a fun project...she gets to tell me about what happened in the story to Jack & Annie and together we learn some fun facts about whatever time/place the story was about.

My son is 8 years old and I can't get him to read anything. No book will keep his interest at all, until we stumbled upon Magie Tree House - Research Guide. Now I am thrilled that he will lay on his bed and read a few chapters at a time

My grandson loves his Magic Tree House collection and these books give more indepth facts about the subject. It is like reading the book all over again! And, in fact, it prompted him to reread the book.

My grandchildren love all the MTH books and research guides. A generation ago, my children that were still young when they were published enjoyed them as well. AND I like them, too. Yes, they are twaddle, but the children learn a lot and read a lot. Sometimes it's ok to read for pure entertainment.

This book was perfect. It has good info. that is usful to know. And it has important facts and details, too! When I read this book I learned so many new things I bet my brain had to grow an inch bigger to fit everything I know in it.

Awesome series for my 4 1/2 year old son. We love the stories, but I especially love the research guides that go along with the stories. I love seeing my son so interested in learning!
