How A Seed Grows (Let's-Read-and-Find-Out Science 1)

Synopsis

How does a tiny acorn grow into an enormous oak tree? This classic Level 1

Let's-Read-and-Find-Out picture book shows how little seeds become the plants and trees that surround us. Now rebranded with a new cover look, this book includes a find out more activity section with a simple experiment encouraging kids to discover what a seed needs to grow. Both text and artwork were expert-reviewed for accuracy. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards.

Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Book Information

Series: Let's-Read-and-Find-Out Science 1

Paperback: 32 pages

Publisher: HarperCollins; Revised edition (August 4, 2015)

Language: English

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

Ages 5 - 7. Offers a basic introduction to seeds and how they grow, then the majority of the book is a detailed description of a project where you plant bean seeds in eggshells, care for them over the weeks, then transfer them to the garden and care for them till they yield beans. If you want to do the project described in this book, it's a great book!!! If you don't want to do it, I wouldn't get the book - I find that if I get a project-based book and then don't do the project, it just makes my kid cranky at

me. I have recommendations for lots of other kids' science books about plants and seeds on my blog [Inventors of Tomorrow](#).

very good book

Excellent
