TIME For Kids Big Box Set Of Why, How And What?

Synopsis

How do submarines work? Why do giraffes have long necks? What is the difference between a fruit and a vegetable? How do animals see at night? Why is a football field 100 yards long? What does HTTP stand for? These are just a few examples of questions kids often ask, and parents can rarely answer! The top-selling TIME For Kids Big Book series have individually covered the most commonly asked How, What, and Why questions that children ask about the world around them. Now, for the first time, the series is being offered as a special three-volume compilation. The How, What, and Why Box Set will satisfy even the most curious of children, with nearly 600 pages bursting with thousands of facts and answers to hundreds of questions. The How, What, and Why Box Set includes the newest title from TIME For Kids, the Big Book of What, plus the Big Book of Why and the Big Book of How. Kids, 8-12, will devour the information on every page. Each book features colorful photos, diagrams, and clearly explained answers covering a wide range of topics including animals, sports, space, the human body, transportation, technology, science and much, much more.

Customer Reviews

Lovely, colorful, informative. I ordered these books for a couple of children, but their mother did not want them. I'm keeping them for myself! Haven't we all wondered WHY, WHAT and HOW at times?

Purchased this for my 6&8y/o boys for XMAS, and my older middle school & high school girls love it too! It comes in really handy when kids need to come up with ideas for research papers or science projects.

My three kids love these books. I have even taken a liking to them. They are easy to read and hold your attention. We quiz each other and enjoy reading these aloud together. Not crazy about the price, but has the cheapest I could find it. \$40+ elsewhere.:)

My (almost) 8-year old loves these books, and is plowing through reading a few pages each night. He is excited about what he reads and tells us (and his teacher) some fun facts each day. A great purchase for a kid really interested in learning!

These books have awesome facts, and are quite accurate. Reading through these I wish there were more facts and could easily get drawn off on a Wikipedia loop. My daughter is currently too young to read or be interested in these, but I'm hoping it will be a great source of knowledge and curiosity for her in the future.

WOW! Great box set for less than \$15 bucks shipped to my door. I purchased 3 sets for Christmas Gifts. The kids are going to have a blast with these books. They will be learning while having fun reading them. Great purchase!

My kids really like these books. They can sit and read for 15 minutes and come back later and read more. Keeps them interested. They don't even realize they are learning.

Easy to read. Interesting subjects for inquisitive minds or just pure entertainment. Hard cover so it would last longer. Box Set is well-priced
