Destination: Space

Synopsis

Hop on board the space shuttle and get ready for the ride of your life as you explore deep space with your five fellow space cadets. This journey of discovery takes you through our local solar system and beyond, to galaxies far and wide. With every encounter, learn more about the science behind the stars, planets, meteors and comets in our sky, and the history of our universe.

Customer Reviews

The size of this book is perfect. It's a big book for a big topic. This book looks at a wide variety of different topics related to space and the earth itself. The brief sections of text combined with the attractive illustrations make for a fun and fascinating journey into the unknown. I appreciated the fact that the author made it clear at several points in the book that there is still a great deal that we, as humans, don't know. Topics covered include: the solar system, planets, the moon, space travel, light, black holes, and more. The book also contains a poster showing northern and southern constellations on one side, with an illustration of the galaxy on the other. I'd highly recommend this book for middle grade readers who love learning about space. I would have liked to see a glossary for the challenging words, but otherwise this is a great book.

This book is fantastically amazingly wonderful! It is an oversize nonfiction book all about space. The

illustrations are bold and beautiful with a lot of facts and information packed onto each page. It is done in a way that is pretty easy to understand and is organized well. All the details and information on each page is enough to keep your star-struck kiddos busy for quite a while. This is one that is a must for budding astronauts and star-gazers. Really a work of art. *I was given this book in exchange for an honest opinion, which this is.

This is a wonderful book on space and all things pertaining to space. Very well written with colorful detail pictures. Easy to follow layout with points of interest such as first animal in space, first cosmonaut, first man on the moon, space race just to name a few for you to see. This book is so packed with information that you will want to come back to it to reread. I highly recommend this book! I was given this book from Quarto Knows Publishing for an honest review.

My grandkids will love this book. Short paragraphs with lots of pictures. Lots of interesting facts in a large format.
